

6. Point Assessment Schedule

6.1 The point assessment schedule will be used to place a vehicle into the proper category when any modifications are made to the vehicle. **Any addition of a kit/system will be assessed an SPA for each individual component/part added.** "Bumping" of a vehicle will occur when certain modifications are judged to offer a competitive advantage over other vehicles in the prescribed category. Points are assessed at technical inspection for such modifications. The addition of modification points, including Stock Assessment Points (SAP) within the Midwestern Council Autocross Classification List, if any, is used to determine when a vehicle is to be bumped to a higher category:

Point Assessment Schedule	
Total Points	Category
0-2	Stays in Stock Category
3-9	Bump to Prepared Category
10-22	Bump to Modified Category
23 and over	Move to Race or Street Tire Class

6.2 Dealer-installed options that are not available from the factory are considered vehicle modifications from the base model. The modifications should be assessed appropriate points as listed in Section **6.3**.

6.3 Points will be assessed at tech as follows:

Tires, Wheels, and Suspension

Adjustable non-factory air spring	4
Coil-over addition or kit (additional camber adjustability is allowed)	4
Tires with a wear rating less than 140	3
Change of rim width, per full inch increment of increase over stock	1
Suspension bushing replacement, excluding sway bars and shock absorbers	1
Sway bar revision or addition: Front=1; Rear=1	1,1
Change of spring rate (including modification of stock springs, i.e. cutting off coils)	2
Other/additional suspension modification, including panhard or track bar	2
Camber plates or other alignment hardware enhancement or changes	1
Chassis stiffening (per each system)	2
Brake conversion, including LB1 option	2

Engine

Engine displacement change (per each 3% increase)	1
Engine swap: all engine swaps will be classed in the appropriate Race or Street Tire Class	
Removal or tampering with emission control device, per device (i.e. Air Pump, EGR)	1
Removal of catalytic converter(s)	1
Intake Manifold change, modification or adaptor	2
Air intake modification (air box) excluding filter element change	1
Camshaft change	2
Valve size change and/or head modifications	2
Port Modification (rotary engine)	4
ECU tunes for Naturally Aspirated Motors for Alternate Fuels (E85)	1
Ignition and/or computer module change (turbo or supercharged engine)	4
Exhaust manifold change (i.e. headers)	1
Open exhaust and/or muffler removal (does not include catalytic converter)	2
Exhaust system enhancement (beyond manifold and converter changes) (i.e. Cat back, downpipe)	1
Accessory drive revisions, including underdrive pulleys	1
Turbo/supercharger system modification or replacement: includes any non-"computer" based mod related to boost control; does NOT include engine computer module points	3
Turbocharger or supercharger addition, not including Intercooler	4
Intercooler change or replacement	2
Intercooler addition	3

Other

Final gear ratio change less than or equal to 20% (from stock or factory-delivered option)	2
Gear ratio change greater than 20% (from stock or factory-delivered option)	3
Limited Slip differential, except exact replacement of stock OEM equipment	2
Replacement of driver's seat with racing seat (Only for vehicles which do not require a lap and shoulder harness)	1
Obvious attempt of weight reduction or weight transfer, i.e., removal of each bumper, removal of or replacement of each body panel, each plexiglas window panel, battery relocation, etc., per modification (first modification = 2, subsequent modifications = 1; maximum = 4)	2,1,4
Addition of non-original aerodynamic device (i.e wing, splitter, airdam) per device=1; (max=2)	1,2
Other points may be assessed by the Chief of Tech for modifications not stated here (1 point max, per modification)
